Product Description

Product Description:

Our degradable plastic bags are certified by ASTM D6400, EN13432, OK Compost, and BPI.

These bags are made of plastic material that is biodegradable, meaning that they can break down into natural elements over time. This makes them a more environmentally friendly option compared to traditional plastic bags that can take hundreds of years to decompose. Our degradable plastic bags are designed to be used as shopping bags, making them perfect for carrying groceries, clothes, and other items. They are also compostable, which means they can be added to your home compost or taken to a commercial composting facility to be broken down even faster.

Investing in our degradable plastic bags is a great way to reduce your carbon footprint and do your part in protecting the environment. By choosing a more sustainable option, you are helping to reduce the amount of waste that ends up in landfills and oceans.

Our bags are available in a variety of sizes to suit your needs. Whether you need a small bag for a quick trip to the store or a larger bag for a full grocery haul, we have you covered.

So why not make the switch to degradable plastic bags today? Not only will you be making a positive impact on the environment, but you'll also be getting a high-quality shopping bag that is durable and reliable.

Applications:

The degradable plastic bag is an innovative product that is designed to provide a more sustainable and eco-friendly alternative to traditional plastic bags. This product is made from materials that are biodegradable, which means that they can break down naturally over time and do not contribute to environmental pollution.

The degradable plastic bag is an ideal product for a wide range of applications. Some of the most common occasions and scenarios where these bags are used include:

Shopping: The degradable plastic bag is a popular choice for supermarkets, grocery stores, and other retail outlets. These bags can be customized with a logo or design to promote a brand or product.

Events: The degradable plastic bag is also a great product for events such as trade shows, conferences, and exhibitions. These bags can be used to distribute promotional materials or other items.

Packaging: The degradable plastic bag is an excellent packaging material for a variety of products. These bags can be used to package food items, cosmetics, and other consumer goods.

Household Use: The degradable plastic bag is also a great product for household use. These bags can be used to store and organize items such as clothes, toys, and other household items.

One of the key features of the degradable plastic bag is that it is single-use, which means that it is designed to be used once and then disposed of. This makes it an ideal product for situations where a disposable bag is needed.

The degradable plastic bag also comes with handles, which makes it easy to carry and transport. The handles are designed to be sturdy and durable, which ensures that the bag can be used to carry heavy items without breaking or tearing.

The degradable plastic bag is a shopping bag type, which means that it is specifically designed for carrying goods purchased at retail outlets. The thickness of the bag is 0.01-0.05mm, which ensures that it is lightweight and easy to carry, yet strong enough to hold the items being transported.

Overall, the degradable plastic bag is a versatile and eco-friendly product that can be used in a wide range of applications. Whether you are a retailer looking for a sustainable alternative to traditional plastic bags, or a consumer looking for a convenient and environmentally friendly way to carry your purchases, the degradable plastic bag is an excellent choice.

Customization:

Support and Services:

Our degradable plastic bag product is designed to provide a sustainable solution for your packaging needs. Our technical support team is available to assist you with any questions or concerns related to the use and disposal of this product. We offer services such as product customization and consultation to ensure that our bags meet your specific requirements.

In addition, we provide guidance on how to properly dispose of our degradable plastic bags to minimize their impact on the environment.

We also offer training sessions for your employees to ensure proper use and handling of the bags.

Our commitment to sustainability extends beyond the product itself. We strive to minimize our carbon footprint throughout the manufacturing process and use eco-friendly materials whenever possible. Our goal is to provide a high-quality product that meets your needs while also preserving the environment for future generations.

Packing and Shipping:

Product Packaging:

Our degradable plastic bags are carefully packaged to ensure they arrive in pristine condition. Each bag is sealed in a clear plastic sleeve and then packed in a sturdy cardboard box to prevent any damage during shipping.

Shipping:

We offer fast and reliable shipping options to ensure that your degradable plastic bags arrive on time. Shipping costs will vary depending on your location and the quantity of bags ordered. Orders are typically processed within 1-2 business days and delivery times will vary based on your location.

FAQ:

A: A degradable plastic bag is a type of plastic bag that is designed to break down into smaller pieces over time through a process called degradation. This process is typically facilitated by exposure to sunlight, heat, or other environmental factors.

Q: How long does it take for a degradable plastic bag to break down?

A: The length of time it takes for a degradable plastic bag to break down can vary depending on a number of factors, including the specific type of bag and the environmental conditions it is exposed to. However, in general, degradable plastic bags can take anywhere from a few months to several years to fully break down.

Q: Are degradable plastic bags biodegradable?

A: While degradable plastic bags can break down over time, they may not necessarily biodegrade. Biodegradation refers specifically to the breakdown of organic materials by living organisms, whereas degradation can occur through other processes.

Q: Are degradable plastic bags better for the environment than traditional plastic bags?

A: While degradable plastic bags may break down more quickly than traditional plastic bags, they still have a negative impact on the environment. They can release harmful chemicals into the soil and water as they degrade, and they may also be mistaken for food by wildlife, leading to ingestion and other issues.

Q: Can degradable plastic bags be recycled?

A: It depends on the specific type of degradable plastic bag. Some can be recycled, while others cannot. It's important to check with your local recycling facility to see if they accept degradable plastic bags and what their specific recycling guidelines are.
