Product Description

Product Description:

One of the key features of these bags is that they are biodegradable. This means that they will break down over time into natural components, without leaving behind harmful microplastics. The use of these bags helps reduce the amount of plastic waste that ends up in the environment, which is a major problem that requires our immediate attention.

Our degradable plastic bags come in various sizes, making them suitable for a range of different applications. Whether you need a small bag for packing snacks or a larger bag for carrying groceries, we have you covered. With the availability of different sizes, you can choose the best fit for your needs.

These bags come with handles, making them easy to carry around. The handles also make it easier to tie the bags securely, ensuring that the contents stay inside. This feature also makes them perfect for carrying heavy items such as books, groceries, and other household items.

The thickness of these bags ranges from 0.01mm to 0.05mm, making them strong and durable. Despite their strength, these bags are still lightweight and easy to carry around. With the right thickness, you can be sure that the contents of the bag won't spill or tear through the material.

In summary, our degradable plastic bags are a great choice for anyone looking to reduce their environmental impact. These bags are made from plastic material, but they are designed to decompose naturally, making them a more sustainable option. With various sizes, handles, and thicknesses available, you can choose the best fit for your needs. Choose our degradable plastic bags and take a step towards a healthier planet.

Applications:

Our customizable quantity options make it easy to order the perfect amount of bags for your specific needs. Whether you are a small business owner looking to package products or an individual looking for a sustainable option for grocery shopping, our degradable plastic bags are a great choice.

The handles on our bags make them easy to carry and transport. They are perfect for carrying groceries, produce, and other items. They are also great for use at events such as trade shows, conferences, and festivals.

Our degradable plastic bags are also ideal for use in the food industry. They are a great option for packaging takeout orders or for use in restaurants and cafes. The compostable nature of our bags means that they will not contribute to the growing problem of plastic waste in our oceans and landfills.

Overall, our degradable plastic bags are a versatile and eco-friendly option for a range of occasions and scenarios. From grocery shopping to event marketing, these bags are a great choice for those looking to reduce their environmental impact.

Customization:

Support and Services:

Our degradable plastic bag product comes with comprehensive technical support and services to ensure that you get the most out of your purchase. Our team of experts is available to assist you with any questions or concerns you may have regarding the product's performance, maintenance, or troubleshooting. We offer a range of services, including installation, training, and ongoing support, to help you maximize the benefits of the product. Our technical support and services are designed to provide you with peace of mind and confidence in your purchase.

Product Packaging:

25 bags per pack

Each bag measures 12 x 15 inches

Package made with recycled materials

Product label made with eco-friendly ink

Shipping:

Ships in a recyclable cardboard box

Shipping label made with eco-friendly ink

Free shipping within the United States

International shipping rates vary by location

FAQ:

A: A degradable plastic bag is a type of plastic bag that is designed to break down into smaller pieces over time when exposed to certain environmental conditions such as sunlight, heat, and moisture.

2. Q: How long does it take for a degradable plastic bag to break down?

A: The time it takes for a degradable plastic bag to break down can vary depending on the specific product and the environmental conditions it is exposed to. However, most degradable plastic bags will break down within a few months to a few years.

3. Q: Are degradable plastic bags environmentally friendly?

A: While degradable plastic bags are designed to break down over time, they still have negative environmental impacts. They can still harm wildlife and pollute waterways if not disposed of properly. It is important to always dispose of degradable plastic bags in a responsible manner.

4. Q: Can degradable plastic bags be recycled?

A: It depends on the specific product and recycling program. Some degradable plastic bags can be recycled, but others cannot. It is important to check with your local recycling program to see if they accept degradable plastic bags.

5. Q: How do I dispose of a degradable plastic bag?

A: Degradable plastic bags should be disposed of in a responsible manner. If possible, they should be placed in a compost bin where they can break down naturally. If composting is not an option, they should be disposed of in a trash bin.
