Product Description

Aluminized Film Bubble Bag

Premium Protective Packaging Solution

Product Structure :

Outer Layer: High-grade aluminized polyester film (8-12 μ m)

Middle Layer: Air-filled polyethylene bubble cushioning (5mm/10mm thickness options)

Inner Layer: Anti-static polyethylene coating

Key Features :

Superior Barrier Protection

Aluminum coating provides excellent moisture resistance (>95% RH barrier)

UV radiation & oxidation protection (blocks 99% light transmission)

Enhanced Cushioning

Air-filled bubbles absorb shocks and vibrations (impact resistance up to 100kg/cm²)

Ideal for fragile items: electronics, glassware, precision instruments

Multi-Functional Performance

Temperature resistance: -50°C to +150°C

EMI/RFI shielding capability (surface resistivity <10³ Ω /sq)

Anti-static properties available (ESD-safe version)

Customizable Options

Available in roll form or pre-made bags

Sizes: 10cm x 15cm to 150cm x 200cm (custom sizes upon request)

Printing capability: Logo/Text imprinting with 4-color process

Applications :

Semiconductor component packaging

Medical device transportation

Automotive parts storage

Luxury goods retail packaging

Temperature-sensitive product shipping

Certifications :

REACH & RoHS compliant

ISO 9001:2015 quality management

Advantages :

30% lighter than traditional metalized packaging

100% recyclable material composition

Cost-effective alternative to vacuum-sealed aluminum foil bags
